QLIK SENSE COURSE

Qlik Sense for QlikView Users

Introduction

Throughout this course, with hands-on activities, you will learn Qlik Sense new skills to build insight driven, self-service applications. Qlik Sense for QlikView users training is designed to enable Qlik Sense skills in those already familiar with QlikView. You will learn step-by-step new way of selecting, filtering, and searching data in Qlik Sense application, but also to convert QlikView into Qlik Sense applications. This course teaches the basics of designing in Qlik Sense applications, including process of creating visualizations and stories, and gives a complete overview of the product's unique features. You will also learn how to create and use Master Items such as dimensions, measures, and visualizations objects, and how to use expressions and functions to enhance user experience. The course combines theoretical concepts with demonstrations and hands-on exercises to teach the essential concepts for designing useful and effective Qlik Sense visualizations and guided stories. Additionally, you will learn how to share insights with others using bookmarks and stories.

COURSE OBJECTIVES AND INTENDED SKILLS

◊   Explain Qlik Sense architecture and components.
◊   Analyze data with Qlik Sense.
◊   Design and create Qlik Sense apps.
◊   Create Master items in the library.
◊   Design and create Qlik Sense Visualizations.
◊   Publish application.
◊   Migrate a QlikView document to a QlikView app.
◊   Identify best practices for Qlik Sense visualization design.
◊   Share insights with Qlik Sense guided storytelling.

THIS COURSE IS RECOMMENDED FOR THE FOLLOWING USER ROLES:

•   Business analysts
•   Data analysts
•   Data architects
•   Data engineers
•   Business Intelligence Professional

Create Visualizations Modules

01. DEPLOYMENT ARCHITECTURE

Objectives

1. Describe the components of a Qlik Sense app.
2. State the Qlik Sense deployment options and their components.
3. Identify the function and business benefit of each deployment option.

Topics

◇ Qlik Sense Deployment architecture
◇ Qlik Sense Enterprise platform
◇ Deployment scenarios

02. WORKING WITH QLIK SENSE

Objectives

1. Describe the Qlik Sense platform.
2. Explore the parts of a Qlik Sense app and utilize them to investigate your data.
3. Discover how to make selections and searches in an app, characterizing the different search options and color-coding for the selection states.
4. Understand how to use stories to present your findings and show your insights.

Topics

◇ Qlik Sense Hub
◇ Selections and selection states
◇ Search types and Insight advisor
◇ Stories to narrate your insights

03. QLIK SENSE CONCEPTS

Objectives

1. Discuss the use of master dimensions and measures and reusable items in the app.
2. Discuss the Alternative dimensions and the Exploration menu.
3. Define and describe the use of variables.

Topics

◇ Reusable items and object library
◇ Additional chart properties
◇ Using variables

04. QLIKVIEW CONVERTER

Objectives

1. Explain the QlikView Converter tool.
2. Outline the QlikView Converter requirements.
3. Explain the conversion process.

Topics

◇ Creating a Qlik Sense app from a QlikView document
◇ Master Items
◇ Visualization conversion

05. BUILD A QLIK SENSE APP

Objectives

1. Review all the basic chart and tables in Qlik Sense and describe the chart and table properties.
2. Create a dashboard in Qlik Sense.
3. Learn how to use and configure Qlik Sense Maps.
4. Styling and branding an app.

Topics

◇ Qlik Sense Visualizations
◇ Additional Qlik Sense objects
◇ Visualizations and object properties
◇ Maps, and map properties
◇ Styling and branding an app

06. SHARING YOUR INSIGHTS

Objectives

1. Create and use Qlik Sense bookmarks and stories.
2. Understand bookmarks and work with them defining custom visualizations.
3. Describe how to use snapshots in Stories

Topics

◇ Saving predefined selections
◇ Bookmark usage
◇ Storytelling and its benefits
◇ Snapshots

07. PUBLISHING APPLICATION

Objectives

1. Describe the benefits of server-side development.
2. Explain how to Export and Import apps.
3. Review the Content library and Upload media option.

Topics

◇ Working with a server (QSE)
◇ Publishing an app
◇ Development considerations

08. REAL EXAMPLE

Objectives

1. Review QlikView application
2. Review Qlik Sense application
3. Navigating and filtering data
4. Insights and story telling

Topics

◇ Filter usage
◇ Selections and selection states
◇ Search types and Insight advisor
◇ Stories to narrate your insights
◇ Build or change existing visualization
